Subject: Official: Pacific Railroad Pioneers

California Board of Education

Good morning!

Another great day to inspire and achieve excellence for IQC leadership at Sac!

The global geo-political system for learning is the constructed on the essential foundation of geography in history.

The fertile soil of North America is how the "meaning of history" begins, to transform our reality of teens-at-risk to losing our history.

Common-core inquiry engages students to explore the knowledge framework and its influences, natural and human, as written/adopted by the California Senate Resolution 33 Pacific maritime routes.

These skills of critical analysis then can be applied to any historical timeline, and daily life, for growing basic knowledge of logical intuition... as has been the case over the centuries.

We must have the separate section wording, for the 19th Century timeline from the Louisiana Purchase to The Spanish-American War

"The Pacific"

for Directors of Instruction to support teaching that opens the local windows in the USA Proud Learning framework for 8th grade emerging teens.

I have attached the Golden State History design for the Teachers' Lesson "Pacific Railroad Pioneers.

Join together for the "Big Purpose" to deliver the opportunity for education excellence.

PACIFIC RAILROAD PIONEERS

The First Transcontinental Railroad was built crossing the western half of America and it was pieced together between 1863 and 1869. It was 1,776 miles long and served for the Atlantic and Pacific coasts of the United States to be connected by rail for the first time in history.
